

SHUBHAM TIWARI

Senior Software Engineer • Backend Systems & Distributed Architecture

Bengaluru, India +91-8699382375 • shubhamtiwariforjob@gmail.com LinkedIn: /in/shubham-tiwari • GitHub: /shubhamtiwari

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of core backend engineering experience building high-throughput, fault-tolerant enterprise web applications and distributed microservices. Proven expertise in PHP (7.x/8.x), modern MVC frameworks (Laravel, Zend, CodeIgniter), event-driven systems, caching strategies, and large-scale data tier modernization (MySQL to MongoDB). Strong background in Object-Oriented Design, RESTful/GraphQL APIs, cloud-native deployments on AWS/Azure, CI/CD automation, and database query optimization. Experienced in leading Agile engineering initiatives and driving high availability (99.9%+) for critical systems.

TECHNICAL SKILLS

Languages & Backend:	PHP (7.x/8.x, OOP, Generators, Design Patterns), Node.js, JavaScript (ES6+), SQL, Core Java (Foundational)
Frameworks & CMS:	Laravel, Zend Framework, CodeIgniter, Drupal (7/8/9/10), WordPress Architecture & Plugin Development
Architecture & APIs:	Distributed Systems, Microservices, RESTful APIs, GraphQL, Caching (Redis, Memcached), Event-Driven Architecture
Databases & Storage:	MySQL, MongoDB, Query Indexing & Optimization, Schema Modernization, Connection Pooling
Cloud, DevOps & CI/CD:	AWS (EC2, S3, RDS, CloudWatch), Microsoft Azure, Docker, Git, CI/CD Pipelines, Linux, ActiveBatch
Engineering Practices:	System Design, TDD, Unit Testing (PHPUnit), Agile/Scrum, High Availability, Production Debugging, Code Reviews

PROFESSIONAL EXPERIENCE

Senior Software Engineer • ALLEN Digital May 2025 – Present | Bengaluru, India

- Architected and scaled the backend for the enterprise **Question Repository System** serving high-concurrency educational workloads using PHP 8.x, Zend Framework, and modular microservices.
- Spearheaded data tier migration of unstructured exam assets from **MySQL to MongoDB**, reducing P99 read latencies by ~35% and improving concurrent database throughput under peak exam traffic.
- Designed and standardized high-performance RESTful API contracts with distributed caching layers (Redis/Memcached), maintaining 99.9% service availability across web and mobile platforms.
- Automated deployment workflows by integrating **Docker containers** and CI/CD deployment pipelines, decreasing release overhead and build failure rates by 40%.
- Collaborated with Product, Frontend, and DevOps teams in 2-week Agile sprints; authored technical design specs and led code reviews for backend modules.

Senior Software Engineer • Softtek May 2022 – Jan 2025 | Bengaluru, India

- Engineered and maintained high-traffic enterprise platforms and custom PHP services on **Drupal 8/9/10** for Fortune 500 corporate clients.
- Identified critical system bottlenecks and tuned complex MySQL database queries, improving average page load performance by 30%.
- Integrated third-party enterprise REST/SOAP APIs, authentication layers, and webhooks within cloud-hosted environments (Microsoft Azure / AWS).
- Enforced strict coding standards, conducted peer reviews, and mentored junior engineers on SOLID principles and clean architecture.

Software Engineer • Soroco India Sep 2021 – Jan 2022 | Bengaluru, India

- Developed scalable transaction management and scheduling backend modules using **Laravel** and REST APIs.
- Implemented automated infrastructure deployment workflows and cloud asset management on **AWS**.

Software Engineer • Erfolg Jul 2019 – Jul 2021 | Chandigarh, India

- Built core server-side business logic and normalized relational databases utilizing **PHP and MySQL** for high-volume management portals.
- Implemented secure API integrations and optimized SQL queries, reducing API response times under concurrent request loads.

Software Engineer • Univisionz Dec 2017 – Jun 2019 | Mohali, India

- Developed custom WordPress CMS architectures, bespoke plugins, and reusable Core PHP backend components.
- Constructed asynchronous data pipelines with RESTful APIs, AJAX, and JavaScript for seamless frontend-backend integration.

KEY PROJECTS & SYSTEMS ARCHITECTURE

ALLEN Question Repository & Assessment Engine | PHP 8, Zend, MongoDB, MySQL, REST APIs, Docker

Designed an enterprise question repository managing millions of assessment records; implemented high-throughput read paths and decoupled data ingestion pipelines.

WabtecCorp Enterprise Platform | [Drupal 9/10](#), [PHP](#), [Cloud Hosting](#), [REST Integrations](#)

Maintained an enterprise content platform; engineered resilient backend modules and cloud-hosted data workflows ensuring 99.9% uptime.

Browzwear 3D Integration Platform | [PHP](#), [GraphQL](#), [REST APIs](#), [Relational DB](#)

Engineered unified data synchronization services integrating GraphQL endpoints with backend business modules for digital asset management.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

2013 – 2017

Punjab Technical University, Punjab, India
